

APPARATUS AND METHOD FOR PAD PRINTING

ABSTRACT OF THE DISCLOSURE

The present invention includes apparatus and method for image transfer onto one of a plurality of a pad medium pages while the pages are aggregated together. A preferred embodiment for a printer includes a housing; a print engine, within the housing, for transferring an image to a transfer medium when the transfer medium is located at a print position; and a transfer medium registration system, coupled to the print engine, for positioning a pad including a plurality of transfer media releasably secured to one another, wherein the print registration system locates one of the transfer media at the print position. The method including positioning a pad at a print position of a print transfer engine, the pad including a plurality of transfer media releasably secured to one another; and transferring an image to one of the transfer media positioned at the print position.
